My dear friend Pearl Bipin,

I congratulate you on your work on balanced ternary chips. The mathematical approaches you have developed for balanced ternary chips are fantastic. 2026 is the beginning of the meta-age, and we will witness a breathtaking launch of balanced ternary chips.

I congratulate you on your awareness of this issue.

Necmettin Türkoğlu

Turkey Balanced Ternary Chip Design Cent

Rawan Selim · 1st

Associate Design Engineer @ EMAS | Electrical Engineering

December 13, 2025, Rawan worked with Er. Pearl but they were at different companies

All LinkedIn members

On

I am writing this recommendation for Mr. Pearl Bipin Pulickal, with whom I worked on a technical project involving the design and optimization of a renewable energy microgrid. I am an Electrical

Design Engineer, and I sought Pearl's support specifically for the mathematical modeling, optimization, and control strategy of the system.

The project required developing a microgrid that could operate reliably under both normal and outage conditions, while keeping operational costs low. After evaluating different options, the system was designed around solar PV, wind generation, and battery energy storage, with diesel generation intentionally excluded due to cost and long-term practicality. Pearl played a key role in shaping this decision and provided clear technical reasoning for prioritizing wind and solar as the main generation sources.

Pearl was responsible for formulating the microgrid optimization problem mathematically and implementing it as a Mixed-Integer Linear Programming (MILP) model. He defined the objective function, operational constraints, battery state-of-charge behavior, and grid interaction logic in a structured and correct manner. He then implemented the full model in Python, using Pyomo, and successfully simulated the system behavior over a 24-hour horizon.

He also built a complete simulation framework, including realistic synthetic data for solar and wind generation based on real-world patterns. The results were clearly presented using plots and graphs that showed power flows, battery charging and discharging, and state-of-charge evolution. His work was well documented in an organized Google Colab notebook, making it easy to review, understand, and extend.

From a working perspective, Pearl was consistent, organized, and reliable. He delivered tasks on time, communicated regularly, and approached the work in a step-by-step and methodical manner. When discussing design decisions, he was clear in his reasoning and open to feedback, which made collaboration smooth and efficient.

Overall, Pearl demonstrated strong capability in applying mathematical optimization to practical energy engineering problems. He understands both the theoretical foundation and the practical constraints of real systems, and he is able to translate that

understanding into working code and usable results.

I would confidently recommend Mr. Pearl Bipin Pulickal for roles or academic programs that require solid analytical skills, applied mathematics, and systems-level thinking, particularly in the area of energy systems and optimization.

Sincerely,
Ms. Rawan Selim
Electrical Design Engineer

I've had the pleasure of knowing Pearl, whose passion for data science, mathematics, and physics is truly inspiring. Pearl has a rare ability to combine deep theoretical understanding with practical application, producing research and solutions that are both innovative and impactful.

What sets Pearl apart is his curiosity and dedication. He doesn't just stop at finding an answer—he digs deeper to uncover the "why" behind the problem. Whether it's analyzing complex datasets, applying advanced mathematical models, or exploring the intricacies of physical systems, Pearl approaches every challenge with rigor and creativity.

His work speaks for itself: insightful analyses, well-structured research, and results that consistently push the boundaries of what's possible. Beyond his technical skills, Pearl is a collaborative and thoughtful teammate, always ready to share knowledge and encourage those around him.

Anyone working with Pearl will quickly see his passion, skill, and integrity shine through. I'm confident that he will continue to make remarkable contributions wherever his journey in science and data takes him.

I've known Pearl Bipin Pulickal since our school days, and even back then, it was clear there was something special about him. Pearl has always been one of the most naturally gifted people I've met, especially when it comes to math. To say he's passionate about it

doesn't quite cut it. While the rest of us were off playing or taking a break, he'd be happily diving into algebra or solving complex problems just for fun.

What's always stood out to me is how he balances that sharp academic focus with such a warm, fun-loving personality. He wasn't just the top scorer in class, he was also the guy who brought his A game to football matches and had everyone laughing with his energy and spirit. He somehow managed to be brilliant without ever being distant or disconnected.

Pearl's curiosity is infectious, he learns because he genuinely wants to, and that enthusiasm shows in everything he does. He's got a rare mix of depth and openness; someone who's equally at ease solving a tricky equation or having a thoughtful conversation about life.

In every sense, Pearl is a true all-rounder, brilliant, driven, curious, and full of heart. Any team would be lucky to have someone like him.

Pearl is someone I've had the pleasure of working with, and I can confidently say he's fantastic at what he does. His data science skills are impressive, and he's always willing to dig deep to find insights. I appreciate his enthusiasm and dedication to helping businesses succeed.

We've worked together on multiple complex projects and research, and Pearl's ability to communicate clearly and tailor his approach to our needs has been really valuable. His background in business and tech gives him a unique perspective, and he's always thinking strategically. What's more, his academic credentials are impressive - he's got a strong foundation in both business and data science, which really shines through in his work.

If you're looking for someone with data science expertise, I'd definitely recommend Pearl. He's talented and enthusiastic, and I've learned a lot from working with him.

I am pleased to recommend Mr. Pearl Bipin. I have known him since our college days and have seen him grow through various challenges with determination and a positive attitude. What I appreciate most about Pearl is his action-oriented mindset. Unlike many who only talk about their goals, Pearl takes initiative and learns by doing.

His perfect score in mathematics during the board examinations is a clear reflection of his hard work and dedication. Additionally, his decision to pursue a path different from the usual choices made by college students shows his confidence and willingness to take bold steps.

I sincerely recommend Mr. Pearl Bipin and wish him continued success in all his future endeavors.

I've known Pearl Bipin Pulickal since childhood, and he's always stood out for his intelligence, kindness, and generosity. Back in Class 10 CBSE, he played a huge role in helping me prepare for the math board exams—always patient, clear, and insightful. He scored a perfect 100/100, and learning from him was both inspiring and impactful. To this day, I turn to him for academic and career guidance. Pearl is not only a brilliant mind but also a truly great teacher and friend.

I'm pleased to recommend Pearl Bipin Pulickal, a graduate of NIT Goa and someone I've had the privilege of learning from during our school years. Pearl has a rare gift for mathematics—not only in mastering complex topics but also in explaining them with clarity and patience.

He helped me immensely during our Class 12 CBSE board exams, especially with challenging subjects like integration and differential equations. His ability to break down difficult concepts made a real difference in my understanding and performance.

Pearl has always been an exceptional student, with a perfect score in Mathematics in Class 10 and a consistent record of academic excellence. His depth in mathematics and its applications, including areas like machine learning, is truly impressive.

I've learned a great deal from him and deeply value the support and insight he has shared over the years.

I had the privilege of working with Pearl Bipin Pulickal as his legal advisor while drafting the patent specification for his innovative Lightning Harvesting Patent, which has been successfully provisionally filed with the Indian Patent Office. Pearl is a visionary thinker, driven by his passion for sustainable energy solutions, and his ability to conceptualize and execute groundbreaking ideas is truly commendable.

During the patent process, Pearl exhibited exceptional professionalism,

meticulous attention to detail, and a collaborative mindset. His dedication to ensuring every aspect of the project was thoughtfully addressed speaks volumes about his commitment to excellence and integrity.

I have no hesitation in recommending Pearl for future endeavors. His creativity, determination, and expertise make him an invaluable contributor to any team or initiative aiming to push the boundaries of innovation.

Sincerely,
Jivitesh Singh

Peal is an exceptional data science professional with a rare combination of technical expertise and strategic thinking. Their proficiency in areas such as machine learning, statistical modeling, and data visualization allows them to turn complex data into meaningful insights that drive business outcomes.

What truly sets apart is his ability to tackle intricate challenges with innovative solutions. Whether developing advanced predictive models or optimizing data pipelines, they consistently deliver results that exceed expectations. His work not only enhances decision-making processes but also empowers teams to leverage data more effectively.

In addition to their technical skills, Pearl is known for his strong communication and leadership abilities. He have a talent for explaining complex concepts in a way that's easy to understand, enabling seamless collaboration across technical and non-technical teams.

To Whom It May Concern,

I am writing to recommend my math tutor, Pearl Bipin. His teaching style is unique and has made a big difference for me. He explains concepts in a way that's easy to understand, using real-life examples that even a small child can grasp.

Mr. Bipin manages time really well. If we had started from the beginning of the year, we would have finished the syllabus months before the exam. He gives just enough homework to help learn the concepts without being overwhelming.

I am confident that his teaching has prepared me well for my re-exam.

Sincerely,

Durva Matondkar

I am pleased to write this recommendation letter for Mr. Pearl Bipin, a graduate of NIT Goa, 2020-2024. During the summer of 2023, he interned at the National Institute of Oceanography under my supervision, contributing significantly to the project "Soundscape and Fish Biodiversity in Coral Reefs using Bioacoustics."

He along with his colleague Mr. Sambhav Prabhu Dessai, preprocessed 86 GB of underwater bioacoustics data from various locations in Goa. They applied advanced digital signal processing and sampling methods, utilizing tools like R programming libraries and Python, along with Jupyter Notebooks, to process, create data frames, and

visualize the data.

They derived important statistical parameters such as mean, median, average, skewness, Acoustic Complexity Index, Acoustic Richness, and Acoustic Evenness Index. Mr. Bipin's analytical skills and his ability to interpret complex datasets were commendable.

He worked closely with our Project Associate Engineer, Mr. Brenner D'Costa, demonstrating excellent teamwork and collaboration. He regularly met with team members to ensure cohesive progress and mutual understanding of project goals.

Pearl Bipin is a versatile and skilled data scientist with proficient knowledge in digital signal processing. He has a proven track record of solving complex data problems with ease. By the end of his internship, Mr. Bipin and his colleague successfully identified locations with higher fish biodiversity based on the bioacoustics data.

In conclusion, Mr. Pearl Bipin is a good candidate with strong technical and interpersonal skills. I highly recommend him for any position or opportunity he pursues and would be an asset to the organization.

With best wishes,

Dr. Prakash Mehra
Head, Marine Instrumentation Division
Senior Principal Scientist
CSIR - National Institute of Oceanography

I had the pleasure of teaching Pearl Bipin, and he consistently demonstrated a proactive and enthusiastic approach to learning,

particularly in mathematical concepts. Pearl exhibited exceptional interest in solving equations and approached problems in unconventional ways. While his peers followed traditional textbook methods, Pearl consistently sought to simplify complex problems, often finding more efficient solutions.

His philosophy of maximizing output while minimizing input was evident in his work. Pearl's belief in smart work over hard work set him apart, as he always aimed to achieve the best results with the least amount of effort. His innovative thinking and dedication to efficiency make him a standout individual who is sure to excel in any endeavor he pursues.

I had the pleasure of witnessing Pearl Bipin's remarkable journey in mathematics, from a humble start to becoming a true genius in the field. Pearl's dedication and hard work are evident from his transformation into a top performer, culminating in him achieving the prestigious title of All India Topper in CBSE Mathematics Board Exams. His consistent excellence, whether scoring 100/100 in mathematics or securing top positions in various competitions like the Gulf Mathematics Olympiad and Hackathon of National Bank of Oman, is a testament to his exceptional abilities.

Pearl's talent extends beyond just achieving high scores; he possesses a rare gift of simplifying complex mathematical concepts, making them accessible to everyone. As a friend and colleague, I've personally benefited from his clear explanations and deep understanding of mathematical principles. It's no surprise that Pearl excels in data science, where a strong foundation in mathematics is paramount. His versatility as an engineer, data scientist, and mathematician is a testament to his multifaceted skill set and unwavering dedication to excellence. Pearl Bipin is truly a force to be reckoned with in the world of mathematics and beyond.

It is my pleasure to recommend Pearl Bipin, an outstanding Data Scientist with exceptional expertise in Machine Learning and Deep Learning, particularly in K-Means Clustering and Convolutional Neural Networks. Pearl's dedication to his work is evident in the excellent results he consistently delivers. His code is not only highly accurate but also remarkably neat, organized, and easy to understand, which greatly facilitates collaboration and implementation.

Pearl's projects consistently achieve accuracy levels above 95%, showcasing his deep understanding and skill in the field. One notable project was his semantic segmentation model for self-driving cars, which truly stood out and demonstrated his capability to handle complex and challenging tasks with finesse.

I have had the pleasure of being Pearl's customer and am continually impressed by the value he provides. Despite my budget constraints, Pearl has always delivered results that far exceed expectations, never complaining about the price. His sincerity, professionalism, and exceptional skill set make him an invaluable asset to any project or team.

I wholeheartedly recommend Pearl Bipin for any Data Science or Machine Learning project. He delivers remarkable results with an unparalleled level of dedication and expertise.

It is great to work with Pearl. He is professional, experienced, sincere, talented and hardworking. He has a strong base in Data Science, Machine Learning and Artificial Intelligence. He knows how to break down and explain complex concepts in common man's language. He is excellent at applying supervised machine learning algorithms like Support Vector Machines, Regression and Clustering Algorithms achieving a result of 99.72% accuracy in one of the classification projects given to him in which he applied SVMs.

I entrusted Pearl with an intricate data manipulation and preprocessing challenge, navigating through extensive data regarding different variables for more than 1,000 companies over 15+ years. To put the magnitude into perspective, had I undertaken this endeavor myself, dedicating 4 hours a day, it would have consumed a staggering 2 months of my time. Yet, Pearl, armed with a mastery of data science, not only defied the complexities but astoundingly transformed the task—originally estimated at 240 hours—into a remarkable achievement completed in a mere 10 hours. He charged me a very nominal fee for the entire work.

Pearl's expertise was the linchpin, orchestrating a symphony of efficiency in data handling. Beyond the deliverables, Pearl generously shared invaluable insights, imparting knowledge on advanced techniques such as Pivot and Unpivot operations and adeptly guiding me on parsing a single column into distinct entities based on specific conditions.

In essence, Pearl is not just a data virtuoso but a teacher, elevating my skills for future challenges. Without hesitation, I highly recommend Pearl for his exceptional skills and unparalleled ability to conquer the most intricate data landscapes with unwavering brilliance.

It has been great to work with Pearl for 2 months. He is sincere, values time, have a good knack and passion for machine learning. He understood his role very quickly, and he turned out to be a workhorse anyone would want to have in the team. He articulated the problem statement effectively in Machine Learning terms and applied Clustering, Auto Encoder neural networks to come up with a deployable solution. The best part of the internship has really been how effortless it is to work with him. He always came prepared to meetings, we always had different conversations because of that and hence we were always taking a step ahead. Coming to his coding skills: that has been effortless as well, modularised and neat !!
